SUMMARY

Aspiring software developer with strong proficiency in C++ and hands-on experience building full-stack web and Android applications. Experienced with Python, Kotlin, JavaScript, Node.js, Express.js, MongoDB, and Git, with additional exposure to computer vision and AI through YOLO11-based development. Strong interest in software engineering, problem solving, and building practical technology solutions, with a focus on continuously expanding technical expertise.

PROJECT

Blind Navigation Assistant · AI-Powered Accessibility Application

Main Project · August 2026 - Present

- Developing an Android accessibility application using Kotlin with computer vision, voice interaction, location services, and emergency assistance.

- Implemented on-device YOLO11 object detection with ONNX Runtime/TensorFlow Lite, including confidence filtering, distance estimation, and threat classification.

- Built voice-command navigation, location queries, obstacle history, torch/detection controls, and emergency actions.

- Added Google Maps/Location integration, SOS and fall detection with guardian contact management.

VOICE

Self learning · voice-h8h059roz-poojithsmenon-3636s-projects.vercel.app/ · May 2026 - June 2026

- Developed a full-stack music streaming platform using React, Vite, Node.js, Express.js, MongoDB, and Mongoose.

- Implemented JWT authentication, audio streaming, search, likes, playlists, and genre-based discovery.

- Built a creator studio with Cloudinary uploads, play-count analytics, and genre-based recommendations.

- Developed RESTful APIs and deployed the frontend on Vercel, backend on Railway, and database on MongoDB Atlas.

GODVALLEY

Self learning · splendorous-quokka-dfa54d.netlify.app/ · January 2026 - January 2026

- Developed a full-stack e-commerce platform using HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB.

- Implemented authentication, product browsing, shopping cart, checkout, order management, and RESTful APIs.

- Built an admin dashboard with order/contact management and analytics; deployed using Netlify and Render.

EDUCATION

Bachelor in Engineering

East Point College of Engineering and Technology · Bengaluru · 2027 · 6.9

SKILLS

Programming Languages: C++, Python, Kotlin, JavaScript, HTML, CSS

Web & Backend: Node.js, Express.js, REST APIs, MongoDB

Mobile & AI: Android Development, Computer Vision, YOLO11, ONNX

Tools & Platforms: Git, GitHub, Android Studio, VS Code, Netlify, Render
